

WLS28-2 LED Strip Light

Datasheet

Banner's LED Strip Lights have sturdy aluminum housings, shatterproof windows, and impressive environmental ratings, making them an ideal general-purpose LED light for machine, enclosure, or other industrial lighting applications.

- 40% brighter and 40% more efficient than previous model
- Low-profile, space-saving design
- Rugged, water-resistant IP69K option
- Available in eight lengths from 145 mm to 1130 mm
- Lensed models or choice of clear or diffused window
- Daisy chain power to multiple lights

Note: When cascading lights, a model with an ON/OFF switch can be used to control the lights cascaded off the switched model.

New Features

- Enhanced light quality: brighter, closer spaced LEDs
- Optional snap clips for easy installation and repositioning
- Capability to dim lights using the wiring pinout (Hi/Lo/Off)
- Optional switch is now Hi/Lo/Off
- Automatic temperature protection built into the unit. Above 50 °C, the light dims to manage heat and protect product lifetime
- Motion sensing models available

Stand-Alone Light—cable

Stand-Alone Light or End Light in a Cascade—QD

First Light in a Cascade—cable

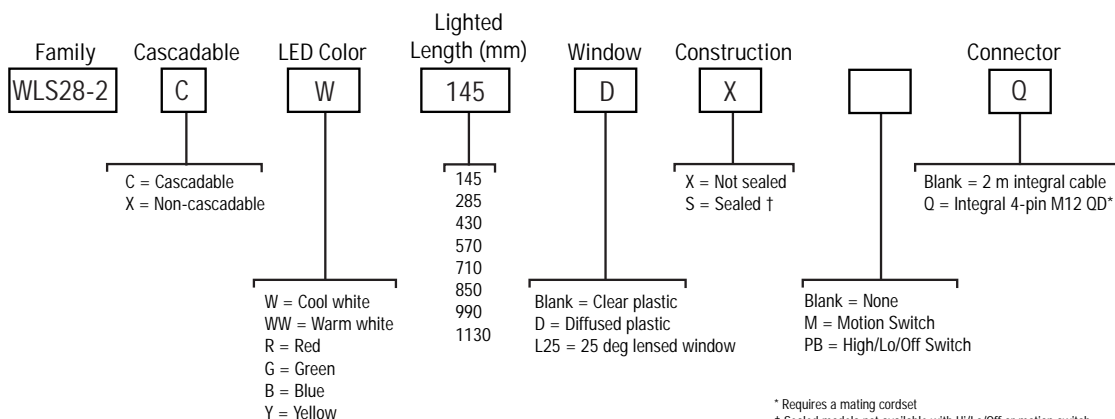

First or Middle of a Cascade—QD

WLS28-2 Work Light Strips are available as either stand-alone models, or as cascade models that can be "daisy-chained" together for a continuous length of lighting, with a minimum of wiring.

Stand-alone models have cable or male QD fitting at one end for power connection, no connections at opposite end. A stand-alone model may be used as the last in the cascade series.

Cascade models have cable or male QD fitting at one end for power connection, female QD fitting at opposite end for connection to other lights in the cascade. Cascade models with cable end can only be used as the first light in the cascade series. A double-ended accessory cordset must be used between each pair of lights in a cascade.

Models

* Requires a mating cordset
 † Sealed models not available with Hi/Lo/Off or motion switch

Application Note

When connecting cascading lights in series at 100% intensity, it is important not to exceed maximum current limitations:

Maximum length of light at 12 V dc: 1.4 m (4.6 ft)

Maximum length of light at 24 V dc: 3.0 m (9.8 ft)

Maximum length of light at 30 V dc: 3.1 m (10.2 ft)

At 50% intensity, double the lengths.

Note: Do not spray cable with high-pressure sprayer, or cable damage will result.
